16.9 fl.oz. Post
Consumer PET
bottles recycled
to make this box

5

4

2.5

3.5

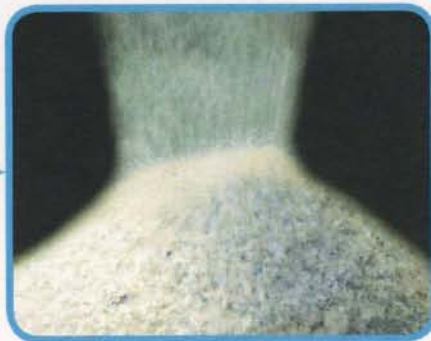

Discarded PET bottles are collected and compacted into bales.

At the Bottle Box™ plant they are then sorted into different colors.

The bottles are ground-up into flakes and washed thoroughly to food grade standards.

The clean washed flake is now ready for the extrusion process.

Rolls of recycled 100% post consumer PET are extruded.

The 100% post consumer PET rolls are then thermoformed into your innovative and artistic Bottle Boxes™.

FACT!

It took five 16.9 fl.oz.
PET beverage bottles to
make this BottleBox™

THE BOTTLE BOX™

Made from 100% post consumer recycled PET beverage bottles-guaranteed. Available in four convenient sizes, our Bottle Box™ is made from 100% post consumer PET bottles! And the story doesn't stop there. As our artistic team developed the Bottle Box's™ unique design, we were also able to create a 21% reduction in material while preserving its integrity and contemporary look. The Bottle Box™ is truly an environmentally conscious design.

GREEN TOGETHER

The Bottle Box™ is the first ever product from the true bottle-to-box recycling process

See back for manufacturing details.

Bottle Box™ makes the difference by transforming recycled PET beverage bottles to finished Food Grade Containers for you. This process is the very first of its kind in the U.S. to utilize 100% recycled bottles to make each Bottle Box™.

We manufacture our Bottle Boxes™ right on site at our California recycling plant. Recycling post consumer PET in this agile way is also extremely cost effective, with the savings passed on to you. Being green just 'makes cents'.
