bakeware is a cost-effective and sustainable alternative to CPET, foil, and metal trays. For use in conventional or micro-wave ovens, our unique thermoformed paper trays and cups are strong and versatile, and can be customized to your exact needs.

CUSTOM APPLICATIONS

• **CUSTOM SIZES:** Why force your product into a 'stock' package if it doesn't fit? offers comprehensive in-house design and prototyping capabilities to help you develop the right packaging solution for your application. We will work with you from concept to production to provide creative, cost-effective, and sustainable alternatives to meet your packaging needs.

• **CUSTOM MATERIALS:** Need a tray that can handle 10 pounds of chicken wings? No problem. Need more release for your brownie batter after baking? No problem. Need a custom printed tray with your logo to enhance your brand image? No problem. The process combines a variety of paperboard materials and functional coatings to achieve the look, cost, and performance for your specific application. Call us with your requirements, and we'll create a custom solution that works!
