THERMAL PACKAGING FOR A GREENER WORLD

**GO GREEN**  
LET'S SAVE OUR OCEANS TOGETHER

# Go-Green Mailer™

## Recyclable & Compostable Packaging

- Developed specifically for the food delivery, specialty pharmaceutical and health care industries
- Replaces environmentally harmful expanded polystyrene (EPS) foam packaging (known as Styrofoam)
- Compostable insulation meets ASTM D6400, EN13424 and home compostable standards
- Multiple no hassle disposal options; compostable, dissolvable and recyclable

## Innovative Cold Chain Packaging

- In-house design, validation, and qualification services are available
- Keeps products cold from packaging to receipt with customizable thermal protection duration times
- Outperforms competition, environmentally and structurally
- Design minimizes edge loss which increases temperature control
- Provides customizable 12-48 hours thermal protection

## Customizable

- Multiple size options
- Extremely cost effective: lightweight and ships flat
- No custom tooling required
- Customizable marketing message & logo print available for qualified volumes
- Stock solutions or custom options to fit your exact payload requirements, as well as temperate and duration requirements
