	NT1025-X-00028	54" x 59" 0.9mil	Liner for curbside and event food scrap collection programs

## Can't Find Your Container?

Follow these steps to choose the optimal Natur-Bag liner:

All measurements are in inches and taken from inside dimensions

### Step 1: Determine container dimensions.

#### Square Container:

- Measure all 4 sides
- Measure the base diagonal
- Measure the vertical length

#### Round Container:

- Measure the base and top diameters
- Measure the vertical length

### Step 2: Calculate the liner size.

#### Square Container:

Liner width = Sum of all 4 sides ÷ 2  
Liner length = Container length + (base diagonal ÷ 2) + 4" (to account for overhang)

#### Round Container:

Liner width = Top diameter X 3.14 ÷ 2  
Liner length = Container length + (base diameter ÷ 2) + 4"

### Step 3: Reference the Natur-Bag Stock® Product Offerings table on the previous page to select the appropriate Natur-Bag liner.

We recommend using Natur-Bag liner samples to ensure the determined liner size works for you.

## Starting an Organic Waste Collection Program?

We can help you kick start your program by providing educational material and signage. Contact us to learn more.
