

REDUCE “ONE-TASTE PLASTIC WASTE” WITH eco•iScoop!

Eco-iScoop, the revolutionary little ice cream taster, is made from sustainable, silky-smooth paperboard. Surprisingly sturdy and material efficient, it provides a greener sampling both you and your customers will feel great about!

PRE-BEND FOR A QUICK GRAB:

- Use our handsome bamboo dispenser or find a container that will hold iScoops **round end down** so they are easy to grab.
- We recommend taking 20 or so iScoops and giving them a **starter bend** all at once.
- iScoops are sanitary to dispense when in container **round end down** – the end people eat from is not touched – no need for gloves!

PINCH AND RELEASE:

(Two dots scoop, one dot to serve):

- ▲ Bend along scores to touch dots.
- ▲ Pinch both dots together to scoop.
- ▶ Hold by one dot to serve to customer (see photo to right).
- ▶ This allows an **easy pass**, and ensures customer will use the iScoop in a **pleasing open position**.
